

Assignment Error Correction Sheet

Question No.	Line No.	Error Type	Error	Error Correction
1.c	18	Syntax Error	Missing closing brace <code>}</code> for the main function block.	Add closing brace <code>}</code> at the end of code.
2.c	24	Logical Error	Infinite loop because loop counter variable is never updated.	Add increment operator: <code>i++;</code> inside the loop.
3.c	9	Data Type Error	Assigning a floating point value to a strict integer variable without typecasting.	Change variable type to float: <code>float tax = 0.05;</code>
4.c	31	Array Error	Accessing array index out of bounds (trying to access index 10 in size 10 array).	Change loop condition to stop before index 10: <code>i < 10</code>
5.c	15	Pointer Error	Dereferencing an uninitialized pointer variable.	Assign a valid address to pointer before using it: <code>ptr = &num;</code>
